

The Daily Dose: Study Tips for Exam and Board Preparation

David E. Klingman, DMD

Diplomate, American Board of Oral and Maxillofacial Pathology

Diplomate, American Board of General Dentistry

The Daily Dose: List of Cases (to accompany handouts)

Case 01a	alveolar rhabdomyosarcoma
Case 01b	esthesioneuroblastoma
Case 01c	Merkel cell carcinoma
Case 02a	EBV related mucocutaneous ulcer
Case 02b	nodular sclerosing Hodgkin lymphoma
Case 02c	Langerhans cell histiocytosis
Case 02d	Kikuchi-Fujimoto, necrotizing histiocytic lymphadenopathy
Case 02e	Rosai Dorfman Disease, neck
Case 03a	basal cell adenoma
Case 03b	polymorphous adenocarcinoma, palate
Case 03c	secretory carcinoma, ETV6-NTRK3 negative
Case 03d	myoepithelial carcinoma
Case 04a	myofibroma
Case 04b	solitary fibrous tumor
Case 05a	chordoma
Case 05b	xanthoma of bone

The Daily Dose: Additional Cases

Case 01d	sinonasal undifferentiated carcinoma (75 yo F, intranasal)
Case 01e	nasopharyngeal carcinoma (64 yo M, left nasopharynx)
Case 02f	Rosai Dorfman, extranodal (14 yo M, nasopharynx)
Case 03e	mixed tumor (37 yo M, left parotid)
Case 03f	mixed tumor, recurrent (65 yo F, right parotid)
Case 03g	mixed tumor (with tyrosine crystals)
Case 03h	myoepithelioma (80 yo M, palate)
Case 03i	monomorphic adenoma (typical features)
Case 03j	mucoepidermoid carcinoma (69 yo M, right parotid)
Case 03k	adenoid cystic carcinoma (cribriform variant)
Case 03l	adenoid cystic carcinoma (invading pulp)
Case 03m	polymorphous adenocarcinoma, intraosseous (69 yo M, right mandible)
Case 03n	polymorphous adenocarcinoma (typical features)
Case 03o	cribriform cystadenocarcinoma (without IHC)
Case 03p	cribriform cystadenocarcinoma (with IHC)
Case 03q	salivary duct carcinoma (43 yo M, left parotid)
Case 03r	salivary duct carcinoma (typical features)
Case 03z	salivary gland (survey of normal histology)
Case 06a	mucormycosis, zygomycosis (7 yo M with AML, palatal-nasal-antral mass)
Case 07a	condylar calcium pyrophosphate-dihydrate deposition (52 yo F)
Case 07b	condylar hyperplasia, gross and histology (21 yo F)
Case 07c	condylar hyperplasia, with osteochondroma and active growth center (21 yo M)
Case 08a	fetus, 7 weeks in utero (full)
